DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to method, classified in class 438, subclass 694.
- II. Claims 16-20, drawn to an integrated circuit, classified in class 257, subclass 499.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as method of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the method as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different method (MPEP § 806.05(f)). In the instant case, an integrated circuit can be fabricated using dielectric materials other than silicon oxide or silicon nitride and conductive gate materials other than polysilicon.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Furthermore, because the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Stephen B. Ackerman on May 10, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
